AIRPORT CONSTRUCTION NOTICE
HANGAR PAVEMENT PRESERVATION
PAVEMENT REMOVAL & REPLACEMENT

Dear Airport Tenants,

The City of Mesa will be performing pavement repairs throughout the City hangar complex on Wednesday, November 17th. This project will make repairs at specific areas that require the asphalt to be removed and repaved. These areas cannot simply be repaired by crack-sealing. The attached map shows the specific locations marked with yellow numbers.

The City will be conducting crack-sealing operations to repair all remaining cracks in the City Hangar complex pavements in either November or December. The contractor has been hired but the start date has not yet been established. I will send out another notice once the crack-sealing project is ready to go. Please feel free to contact me directly with any questions at 480-644-4230.

Sincerely,

Jeffrey S. Tripp, A.A.E.
Airport Projects Supervisor
